The image contains a detailed plan of a construction site, including various marked areas and notes. The key plan highlights the location of different utilities, such as gas, electricity, and water lines, as well as the path of the new channel. The plan also includes notes on existing and new structures, with specific elevations and directions for work execution.

Key points from the plan:
- **Existing and New Structures**: Various structures are labeled, including those related to gas, electricity, and water systems.
- **Elevations**: Specific elevations are marked at various points along the plan, indicating the height of different utilities or structures.
- **Notes**: General notes on work execution, such as the need to consult specific drawings and the involvement of different stakeholders.

The plan is designed to guide the construction process, ensuring that all utilities are appropriately aligned and that safety protocols are followed.
