Dear Mary

Proposed Oxford Flood Alleviation Scheme

Planning Application ref: MW.0028/18

Further information under Regulation 25 of the Town and Country Planning (Environmental Impact Assessment) Regulations 2017

Following your letter dated 21 August 2018 we have prepared the further information to accompany our planning application for the Oxford Flood Alleviation Scheme. I attach a note to this letter responding to the issues you raise or setting out where the information can be found to cover the points raised in your letter.

The following documents are submitted to support the application:

- A revised Flood Risk Assessment, Version 6 – October 2018 and Appendix A. Please note the other appendices to the FRA have not changed.
- A Landscape and Habitat Creation Delivery and Management Plan. This replaces the Landscape and Habitat Management Plan previously submitted.
- Revised Planting Plans. These replace the previously submitted Planting Plans.

We have also taken the opportunity to update our planning application in light of some minor design amendments. These amendments are:

- A minor change in the red line planning application boundary at South Hinksey and Egrove Park (see Figure 1.1 of the ES addendum)
- Additional areas of planting e.g. at Seacourt Nature Park
- Additional areas of rip rap to provide scour protection to the new channel
- Construction of a new low flow weir at Hinksey Stream – operates during very low conditions to help maintain water levels in the Hinksey Railway fishing ponds
- Changes to proposed temporary and permanent diversions of Public Rights of Way (PRoW)
- Removal of proposed flood gate at Henry Road as a further review of ground levels has identified that they are no longer required for flood defence.
• Requirement for 24 hour working during the installation of culverts under the A423,

To aid understanding of the changes I attach a Drawing/Plan register which sets out for you which drawings from the original submission have been replaced as a result of this further information and which drawings have been added.

If you have any queries on the application and the information submitted please get in touch. We would be happy to meet with you to discuss the application if you feel it would help.

Yours sincerely

Chris Harding

Oxford Flood Alleviation Scheme
